Art Unit: 2636

1. Claims 5,6,8,9,14,15,17 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Language "the previous claim" is indefinite as to which previous claim is referred to, and the claims should be particularly identified.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

a. Claims 1 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Doctor.

Doctor discloses a hot rail car surface detection system comprising IR sensor 36, converting received signals into electrical signals via converter 66, filter 56 for producing a filtered array of signals (col. 3, lines 51-55), and comparator means 70 for determining if a maximum filtered value 100 is excessive enough to provide an alarm, in order to avoid false alarms (col. 1, line 56).

Although Doctor does not specifically state that a signal is compared to a threshold, choosing to make such a comparison with means 70 would have been obvious since it would have had to have

compared the incoming signal to some reference value in order to
determined if it was excessive or not.

3. Claims 2-6 and 11-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 7 and 16 are allowed.

5. Claims 8-9 and 17-18 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. King, Grosskopf, Bambara, Sutnar, Yaktine , and Gallagher disclose train wheel detection systems.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brent A Swarthout whose telephone number is 703-305-4383. The examiner can normally be reached on M-F from 6:30 to 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeff Hofsass, can be reached on 703-305-4717. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.
